

Ek app jahan user internet se koi bhi cheez save kare aur system automatically usko organize, relate aur resurface kare.

Example:

User save karta hai

- article
- tweet
- image
- youtube video
- pdf

App automatically karta hai:

- tag suggestions
- topic clustering
- knowledge graph
- related items suggest
- resurfacing ("2 months ago you saved this")

Key Features

- browser extension save tool
- semantic search
- graph visualization
- AI tagging (optional)
- memory resurfacing
- collections

- highlight system

Tech Complexity

Frontend

- React / Next
- graph visualization (d3.js)

Backend

- Node / Python microservice
- embedding search
- queue workers

Infra

- object storage
- vector DB
